

Flange Seal Liquid Transfer Angle Valves for Bulk Storage Containers

Designed especially for liquid transfer of LP-Gas from consumer bulk storage containers when used with a Chek-Lok® or equipped with an integral excess flow valve. May also be used for vapor LP-Gas service.

These liquid transfer are equipped with an integral excess flow valve for liquid transfer directly from the tank fitting, or without an integral excess flow for LP-Gas transfer through a Chek-Lok.

When equipped with an integral excess flow valve (7550PX), the valve should be mounted in a forged steel 3000 lb half coupling must be full length-equivalent to a forged steel 3000 lb half coupling.

The excess flow valve will not function properly if these specifications are not met.

Part Number	Inlet Connection	Outlet Connection	Integral Excess Flow	Accessories	
				Hydrostatic Relief Valve	Vent Valve
7550P	3/4" M. NPT	3/4" F. NPT	No	3127U	3165
A7550P				SS8001J	TSS3169
7550PX			Yes	3127U	3165
A7550PX				SS8001J	TSS3169
7551P	3/4" (Undersize)	1/2" F. NPT	No	3127U	3165
A7551P				SS8001J	TSS3169
7550UP	3/4" (Undersize)	1 1/4" -6NA-2G		3127U	3165

Diaphragm Seal Globe Valves

The diaphragm seal construction provides a permanent seal for the valves steam, eliminating the necessity for adjusting or repacking required with ordinary packed type valves.

Positive opening of the valve is assured because there is no dependence upon springs. The valve seta is positioned mechanically - the valve stem being coupled to the diaphragm stem by means of a swivel connection. This design provides a square shut-off with minimum seat wear.

Diaphragm Seal Globe Valves for Cylinder Charging Manifolds and Filling Hoses

Designed for positive shut-off and long maintenance-free service life in a variety of LP-Gas services. Ideal for cylinder charging manifolds, filling hoses, bulk plant applications, domestic and industrial use.

Part Number	Inlet and Outlet Connection F. NPT
2553	1/4"
2553A	3/8"
